Aluminium Security Systems

Hinged Security Doors

Sliding Security Doors

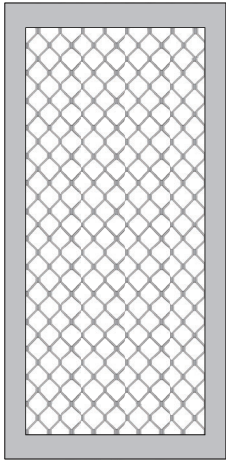

Fixed Security Windows

Enhanced Security: *Aluminium grilles and Meshes are designed to be tough and hard-wearing. They can be fitted with locking mechanisms and reinforced frames to prevent forced entry, a perfect added layer of security to your home.*

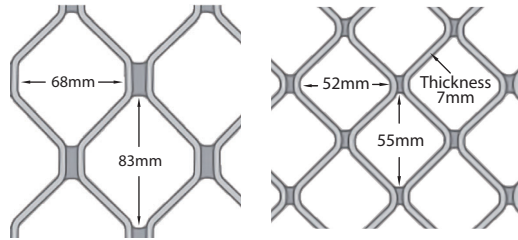

Low Maintenance: *Aluminium doors are easy to maintain and require very little upkeep. They can be cleaned with just soap and water, and do not need to be painted or stained.*

Durability: *Aluminium is a highly durable material and resistant to rust and corrosion, it is also weather-resistant, which means it can withstand harsh environmental conditions.*

Aluminium Diamond Security Grille

Diamond Size: 68 x 83 mm
Grille Thickness: 7.0 mm

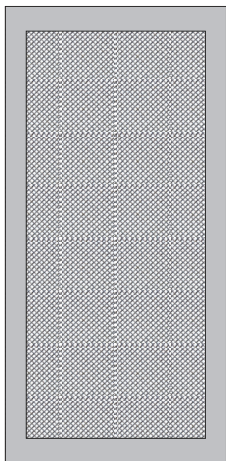

Diamond Size: 52 x 55 mm
Grille Thickness: 7.0 mm

Durability: Our aluminum grilles are strong that can withstand harsh weather conditions and physical impact.

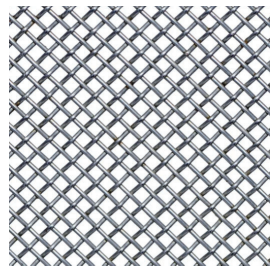

Cost-effective: Compared to other security screen options, aluminum grilles are typically less expensive.

Ventilations: Our aluminium grilles provide better ventilations and air flows.

An Insect Screen could be installed behind the grilles if there is a high incidence of insects.

316 Marine Grade Stainless Steel Mesh

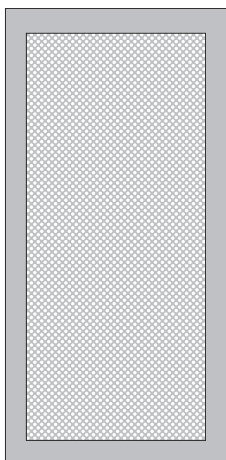

Mesh Thickness: 0.80 mm

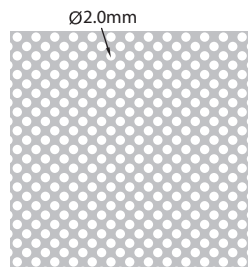

High Security: Stainless steel mesh is a strong and durable material that can withstand significant force, making it a good option for high-security applications.

Transparency: Stainless steel mesh is transparent and allows for unobstructed views, making it a good option for security screens that are also designed to enhance visibility.

Corrosion-resistant: Stainless steel is resistant to corrosion, which means it can withstand exposure to salt, moisture, and other harsh elements.

Aluminium Perforated Screen

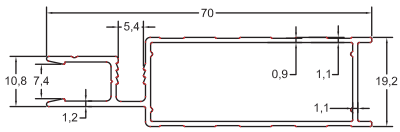

Hole Size: Ø2.00 mm
Screen Thickness: 1.60 mm

Light & Ventilation Control: Perforated screens allow natural light and fresh air to enter the room while providing some level of shade and airflow control. This can help in maintaining a comfortable indoor environment and reducing reliance on artificial lighting and ventilation systems.

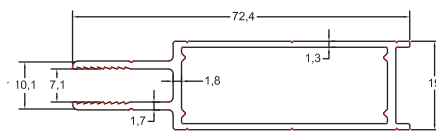

Weather Resistance: Aluminum Screen are highly resistant to corrosion, making them suitable for outdoor applications. They can withstand exposure to rain, UV rays, and other weather elements without deteriorating.

Security: The solid metal construction and small perforations make it difficult for unauthorized individuals to penetrate or tamper with the screen.

Powdercoating

Our powder coating aluminum provides an attractive, durable, and cost-effective solution that is environmentally friendly and customizable to suit a wide range of design needs.

Durability: Powder coated aluminum is extremely durable and can withstand harsh weather conditions, including extreme heat, cold, and humidity. The powder coating also provides protection against scratches, chipping, and fading, which makes it an ideal choice for outdoor applications.

Aesthetics: It provides a smooth, even finish that is available in a wide range of colors and textures. This allows for customization and flexibility in design choices, making it an attractive option for architectural, automotive, and consumer applications.

Environmental Sustainability: Powder coating is an environmentally friendly alternative to liquid paint. It produces very little waste, and the overspray can be collected and reused, reducing waste and saving on material costs. Additionally, powder coating does not emit any volatile organic compounds (VOCs) into the air, making it a safer option for the environment.
