Aluminium Entrance Doors

Vertical Series

Edgeframe Series

Double-side Options

Energy-efficient:

Aluminium doors are known for their excellent thermal insulation properties, especially with our NEW Thermal Designs, they can help keep your home warm in the winter and cool in the summer.

Durability:

Aluminium is a highly durable material and resistant to rust and corrosion, it is also weather-resistant, which means it can withstand harsh environmental conditions.

Low Maintenance:

Aluminium doors are easy to maintain and require very little upkeep. They can be cleaned with just soap and water, and do not need to be painted or stained.

Powder Coat

Our powder coating aluminum provides an attractive, durable, and cost-effective solution that is environmentally friendly and customizable to suit a wide range of design needs.

Durability: Powder coated aluminum is extremely durable and can withstand harsh weather conditions, including extreme heat, cold, and humidity. The powder coating also provides protection against scratches, chipping, and fading, which makes it an ideal choice for outdoor applications.

Aesthetics: It provides a smooth, even finish that is available in a wide range of colors and textures. This allows for customization and flexibility in design choices, making it an attractive option for architectural, automotive, and consumer applications.

Environmental Sustainability: Powder coating is an environmentally friendly alternative to liquid paint. It produces very little waste, and the overspray can be collected and reused, reducing waste and saving on material costs. Additionally, powder coating does not emit any volatile organic compounds (VOCs) into the air, making it a safer option for the environment.

Stocked Colours

Special Colours

* Other colours can be customised

Glass Options

Glazed entrance doors provide a range of benefits, including improved aesthetics, energy efficiency, security and low maintenance.

Our Aluminium Doors can be double glazed in a variety of glass types.

Clear Glass

Clean glass is a type of clear glass that is treated to provide a low level of reflectivity and high transparency. It offers excellent light transmission, making it ideal for applications that require maximum natural light.

Etchlite Glass

Etchlite glass is a type of glass that has a frosted or etched appearance, which makes it ideal for privacy applications. Etchlite glass also provides excellent sound insulation and can be laminated for added safety and security.

Cathedral Glass

Cathedral glass is a type of decorative glass that features a range of patterns with a textured surface. It can create a striking visual effect when used in windows, doors. Cathedral glass also offers a level of privacy while still allowing natural light to enter the space.
