

SD Aluminium CANOPY SYSTEMS PRODUCT CATALOGUE

*Smart Shelter Solutions
Strength, Style, and All season Performance*

2026-2027 Edition

Our Story ...

At SD Aluminium, we build outdoor spaces that go beyond shelter — creating year-round comfort with adaptable canopy systems. From robust structures to insulated roofing and smart enclosures, our canopy solutions transform open areas into usable, protected living zones.

Whether you're extending a patio, enclosing a deck, or designing a freestanding cover, our modular systems provide strength, style, and peace of mind for worry-free outdoor living.

Transform Outdoor Spaces, Seamlessly

Every element of our canopy range is designed to work together — combining strength, insulation, and customisation for all-season performance. Choose from integrated blinds, doors, or windows to complete the space and create a functional outdoor room tailored to your lifestyle.

Shade. Shelter. Style. _____

**DESIGNED FOR
THE WAY YOU LIVE.**

A3 CANOPY System

- Sleek, modern shelter for patios, decks, or driveways.
- Protects from sun and rain while enhancing outdoor living.
- Ideal for both residential homes and small commercial spaces.

A5 CANOPY System

- Built for NZ conditions with proven all-weather performance.
- Modular design allows flexible sizing and configurations.
- Add side blinds or insulated roofing for comfort and privacy.

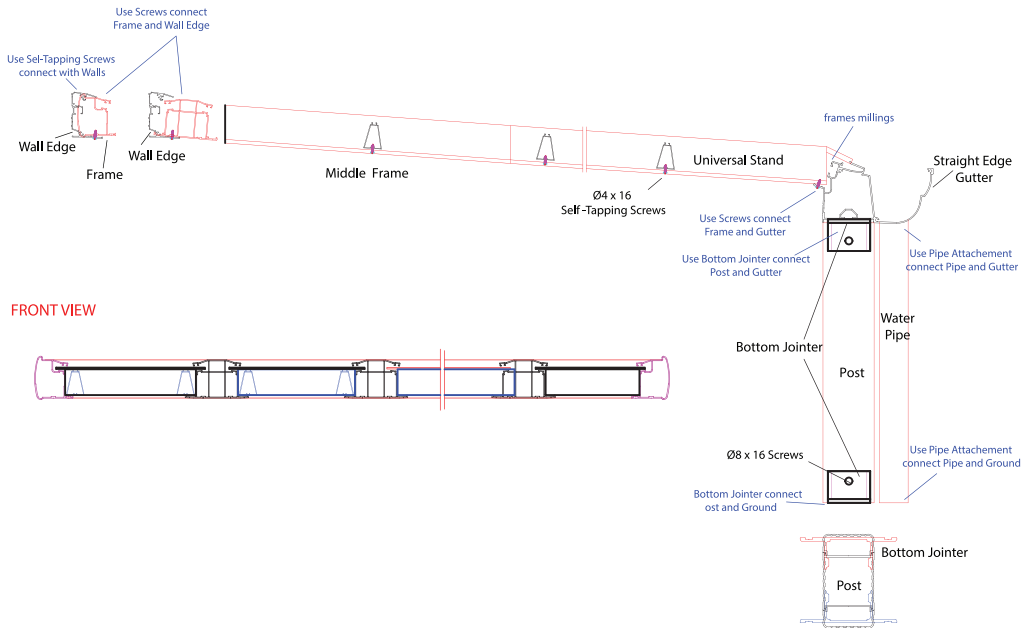

A8 CANOPY System

- Clean, low-maintenance structure with lasting durability.
- Integrates easily with existing architecture or landscaping.
- Installation-friendly design for efficient on-site assembly.

Insulated Roofing Canopy System

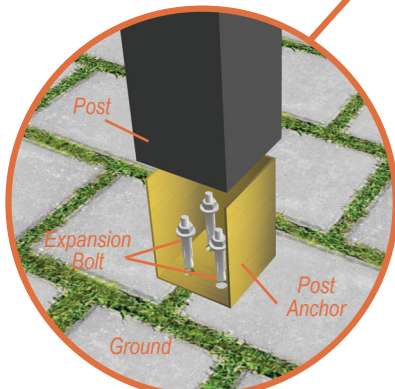

Use **Screws** to fix the **Roof Panel** to the **Frame** at the slot, then cover the slot with the **Edge Profile Cover**.

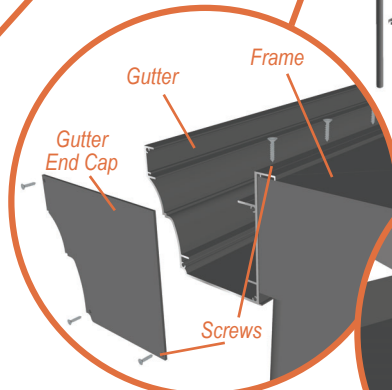

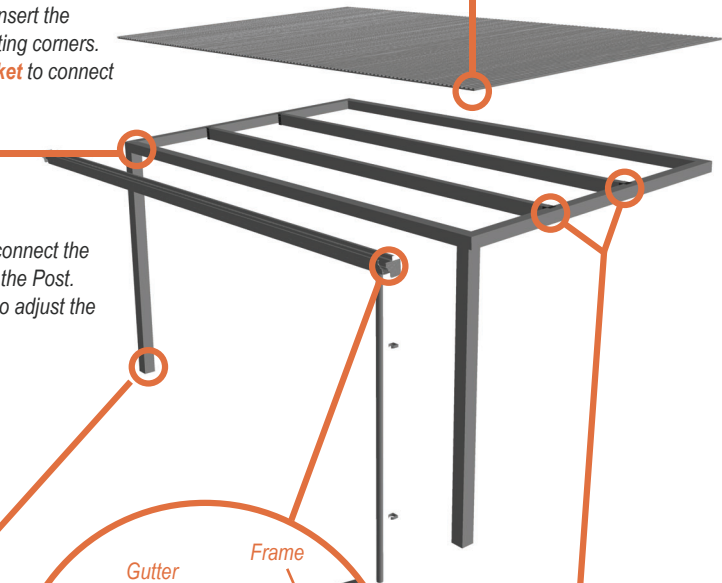

Cut the Rails to **45°** and insert the **Corner Jointer** when setting corners. Then, use the **Post Bracket** to connect to the Post.

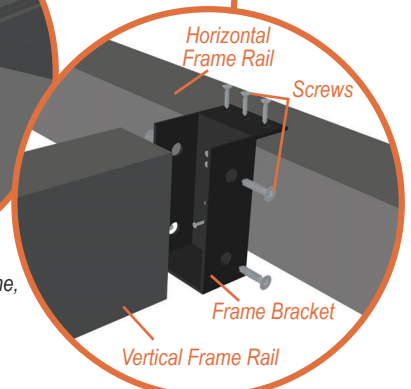

Use the **Post Bracket** to connect the **Horizontal Frame Rail** to the Post. Place **Packers** if needed to adjust the sloping angle.

To set the **Post**, place the **Post Anchor** and fix it with 4 X **Expansion Bolts**, then slid the Post over the Anchor.

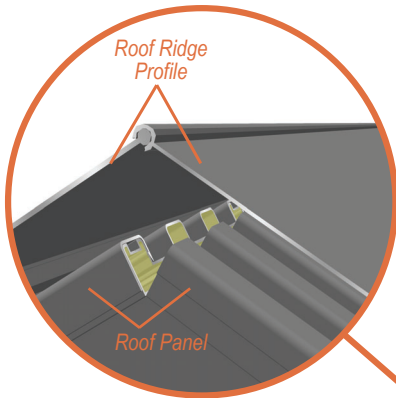

Set the **Gutter** on the edge of the frame, then use **Screws** to fix it to the frame

To install Cross Rail, Mount the **Frame Bracket** to the **Horizontal Rail**, then fix the **Vertical Rails** to the bracket.

Insulated Roofing Kennel System

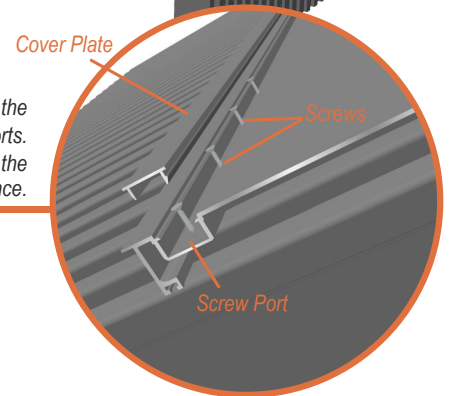

Roof Ridge Profile

Roof Panel

Our innovative **Ridge System** uses a two-piece design where one profile slides into another, creating an **Interlocking, Waterproof** System.

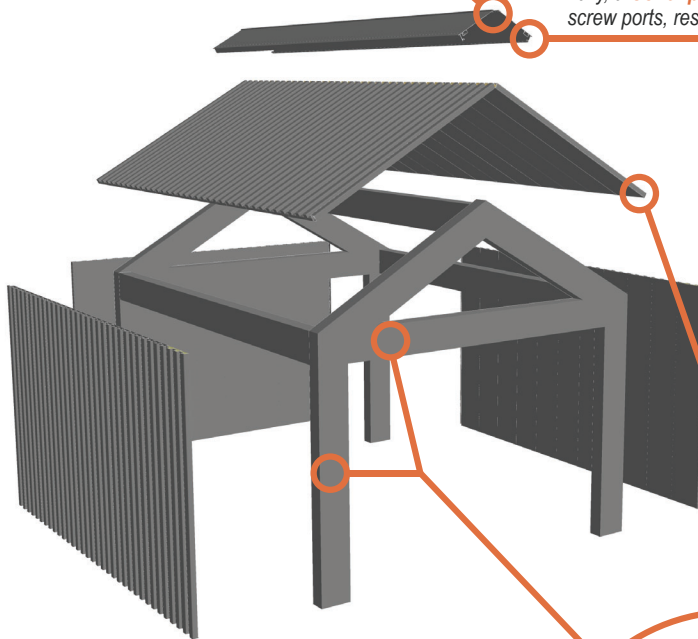

The ridge profile is securely fastened to the roof panel using **Screws** at designated ports. Finally, a **Cover plate** is applied to conceal the screw ports, resulting in a sleek appearance.

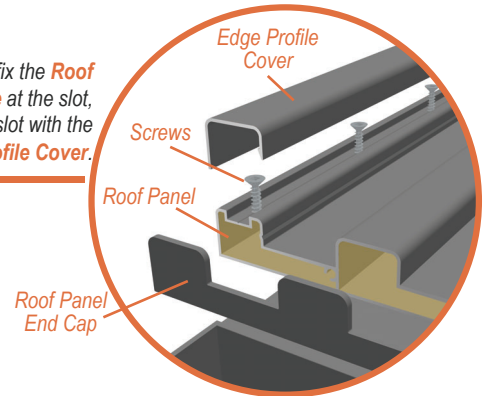

Cover Plate

Screws

Screw Port

Use **Screws** to fix the **Roof Panel** to the **Frame** at the slot, then cover the slot with the **Edge Profile Cover**.

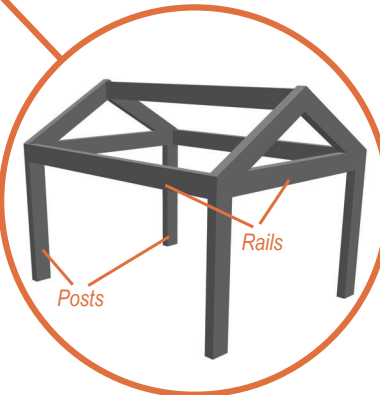

Edge Profile Cover

Screws

Roof Panel

Roof Panel End Cap

The **Frame** of this system can be **Fully Customized** to suit your preferences, whether you desire a steep sloped roof or a nearly flat one. The **Rail** profiles are also adjustable, allowing you to tailor the design to perfectly match your project requirements.

Sliding Door System

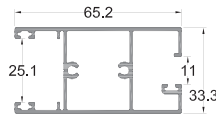

Our **Sliding Door** system offers a sleek and functional solution for modern spaces.

Featuring a **Lock Stile** around the glass door panel, the design ensures security and elegance. The **Sliding track** is seamlessly integrated into the door frame, while the **Castor Wheel** is securely fixed to the door panel.

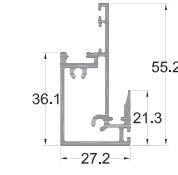

This allows the door to glide smoothly along the track, providing effortless operation and a stylish aesthetic for any room.

Hinge Door System

Our **Hinge Door** system is designed for simplicity and durability. The glass panel is inserted directly into the **Hinge Door Stile**, creating a clean and contemporary look. The door panel is then securely attached to the **Hinge Door Frame**, ensuring stability and ease of use.

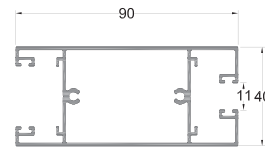

This straightforward system is perfect for those seeking a classic door solution with reliable performance.

Window System

Our **Window System** combines functionality and ease of assembly. The **Window Sash** is meticulously constructed and then effortlessly seated into the **Window Frame**. This design not only ensures a snug fit but also enhances the overall aesthetic of the window.

Ideal for a variety of applications, this system provides a reliable and visually appealing window solution.

Extrusion Powder Coating

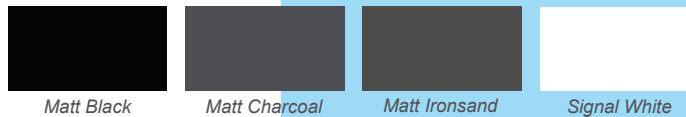

Our powder coating aluminium provides an attractive, durable, and cost-effective solution that is environmentally friendly and customisable to suit a wide range of design needs.

Durability: Powder coated aluminium is extremely durable and can withstand harsh weather conditions, including extreme heat, cold, and humidity. The powder coating also provides protection against scratches, chipping, and fading, which makes it an ideal choice for outdoor applications.

Aesthetics: It provides a smooth, even finish that is available in a wide range of colours and textures. This allows for customisation and flexibility in design choices, making it an attractive option for architectural, automotive, and consumer applications.

Environmental Sustainability: Powder coating is an environmentally friendly alternative to liquid paint. It produces very little waste, and the overspray can be collected and reused, reducing waste and saving on material costs. Additionally, powder coating does not emit any volatile organic compounds (VOCs) into the air, making it a safer option for the environment.

*** NOTE:** Custom colours are available upon request, additional costs and lead times may apply.

PC Sheet Options

Using PC boards for canopy construction provides a durable, versatile, and cost-effective solution that can enhance the aesthetics of any residential spaces.

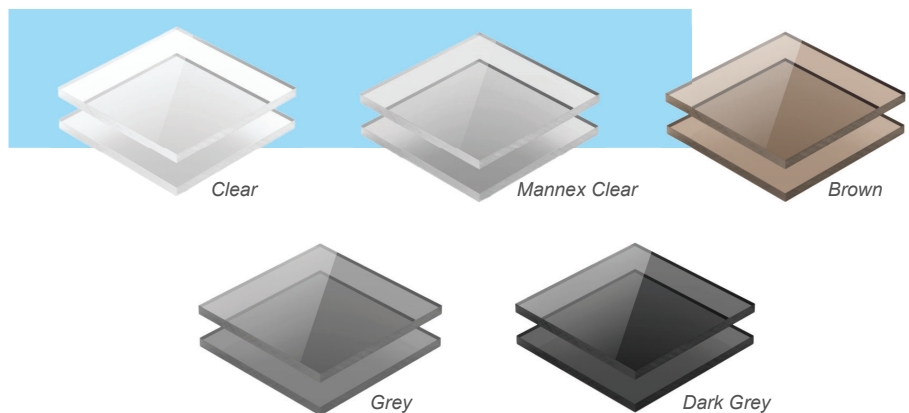

Durability: PC boards are resistant to impact, weathering, and UV radiation, making them an excellent choice for outdoor canopy.

Light Transmission: PC boards have excellent light transmission properties, allowing natural light to filter through the canopy while protecting against UV radiation.

Lightweight: PC boards are lightweight, making them easy to handle and install.

Cost-effective: A cost-effective alternative to glass or acrylic for canopy construction, offering similar benefits at a lower price point.
