MODULAR FORMWORK SYSTEM

PRODUCT CATALOGUE

Efficient Modular Formwork Solution
Build for Faster, Smart Foundations

2026-2027 Edition

Our Story ...

SD Aluminium Modular Foundation Formwork System is designed to make foundation preparation faster, cleaner and more efficient.

Built from durable reusable aluminium components, the system provides a straight, consistent formwork edge while reducing the need for traditional timber boxing. Modular panels, corners and adjustable rebate components allow the system to suit a wide range of residential foundation layouts.

Simple to assemble, easy to reposition and designed for repeated use.

Build Faster, FormSmarter

Our Aluminium Security System range is purpose-built for both residential and commercial applications—offering peace of mind without compromising on design.

Straight Formwork Panels

Modular sections for clean and consistent foundation edge

Corner Components

Purpose-designed connections for accurate internal and external corners

Adjustable Rebate System

Telescopic components for flexible rebate positioning and different foundation layouts

STANDARD Formwork Panel

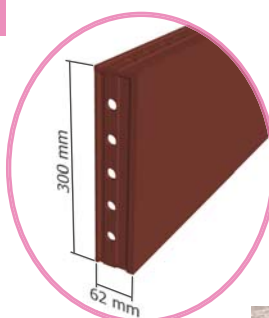

A robust modular panel system designed for fast and accurate foundation setup. Continuous fixing holes along the panel edges provide flexible connection points, while dedicated Y-post holes allow secure positioning and bracing on site. Available in multiple standard lengths to simplify layout planning and reduce on-site adjustment.

Product Code	Panel Length
SFL0.3CG	0.3m
SFL0.6CG	0.6m
SFL1CG	1.0m
SFL2CG	2.0m
SFL3CG	3.0m

TELESCOPIC Formwork Panel

An adjustable extension system designed to accommodate non-standard foundation dimensions without cutting or custom fabrication. The telescopic design allows quick on-site adjustment while maintaining alignment with the surrounding formwork. Available in three adjustable size ranges: 0.3–0.5m, 0.6–1.0m and 1.0–1.8m.

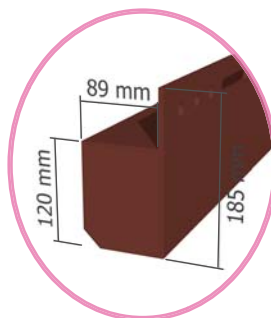

Product Code	Retracted Length	Extended Length
EFL0.3CG	0.3m	0.5m
EFL0.6CG	0.6m	1.0m
FL1CG	1.0m	1.8m

STANDARD Rebate Section

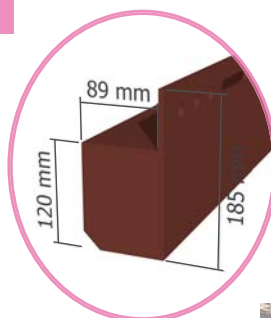

A fixed-length rebate system designed for fast and accurate foundation setup. Continuous fixing holes provide flexible connection points for secure installation and alignment on site. Available in four standard lengths — 0.5m, 1.0m, 2.0m and 3.0m — to suit a wide range of foundation layouts and minimise on-site modification.

Product Code	Section Length
RBL0.5CG	0.5m
RBL1CG	1.0m
RBL2CG	2.0m
RBL3CG	3.0m

TELESCOPIC Rebate Section

An adjustable-length rebate system designed for non-standard foundation dimensions. The telescopic construction allows fast on-site adjustment without cutting or custom fabrication, while maintaining a clean and continuous rebate profile. Available in two adjustable size ranges: 0.3–0.5m and 1.0–1.8m.

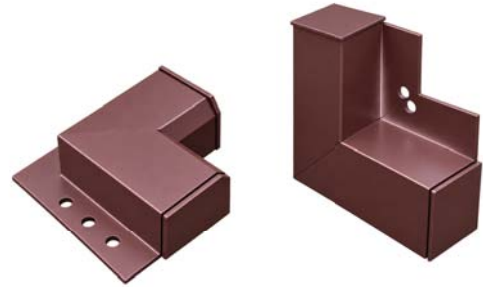

Product Code	Retracted Length	Extended Length
RBEFL0.3CG	0.3m	0.5m
RBEFL1CG	1.0m	1.8m

REBATE Corner Section

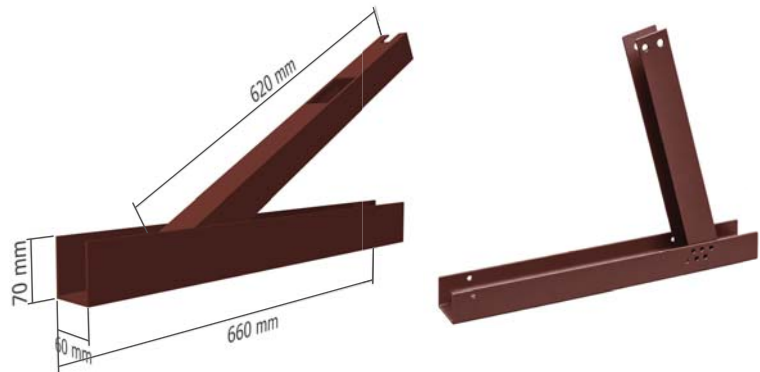

A purpose-built rebate corner designed for fast and accurate foundation setup. Available in both Internal and External Corner configurations. Each corner measures 260mm on both sides and features a 65mm extension for secure connection and alignment with adjoining rebate sections.

Product Code	Corner Type	Leg Length	Extended Length
RICE FL0.212CG	Internal	260mm	65mm
RICE FL0.244CG	External	260mm	65mm

Panel Side Support Brace

A heavy-duty side support brace designed to stabilise and align formwork panels during installation and concrete pouring. The base rests on the ground, while the angled arm secures to the panel for lateral support.

Product Code	Base Length	Brace Length
FMBL0.66CG	660mm	620mm

Fixings & Accessories

Y-Post - Waratah Post

A purpose-built rebate corner designed for fast and accurate foundation setup. Available in both Internal and External Corner configurations. Each corner measures 260mm on both sides and features a 65mm extension for secure connection and alignment with adjoining rebate sections.

Product Code	Height	Number of Holes	Weight
SYP0.6M	0.6m	3	1.08kg
SYP0.8M	0.8m	5	1.44kg
SYP0.9M	0.9m	5	1.62kg
SYP1.2M	1.2m	11	2.16kg
