

SD Aluminium **ENTRANCE CANOPY** PRODUCT CATALOGUE

*Stylish Shelter for Modern Living
Built for Protection, Engineered to Last*

2026-2027 Edition

Our Story ...

At SD Aluminium, we supply and fabricate aluminium entrance canopies for residential and commercial projects across New Zealand. Our range combines practical design with a clean, modern appearance to complement different building styles.

We offer flat panel and louvre blade designs, with custom-made options to suit individual project requirements. Each design offers a different combination of appearance and function, giving customers flexibility when choosing a canopy for their entrance.

Made from durable, low-maintenance aluminium, our canopies are designed for outdoor use. With a choice of designs, sizes and configurations, SD Aluminium helps customers find a canopy solution suited to their property and project.

Entrance Canopy System

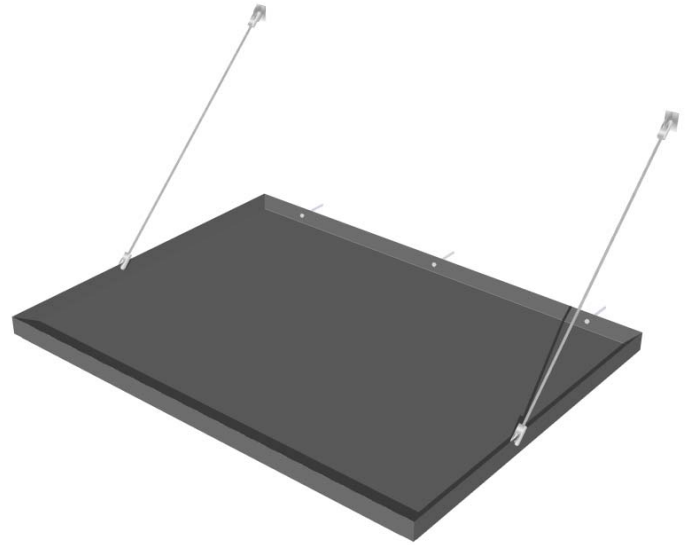

Entrance Canopy System

Flat Panel Entrance Canopy

Manufactured from 2–3mm **Folded Aluminium Sheet** with clean, sharp edges and integrated drainage holes along the front edge.

Available with either stainless steel tension rods or wall-mounted brackets, offering flexible installation options to suit different architectural styles, site conditions and preferences.

Key Features

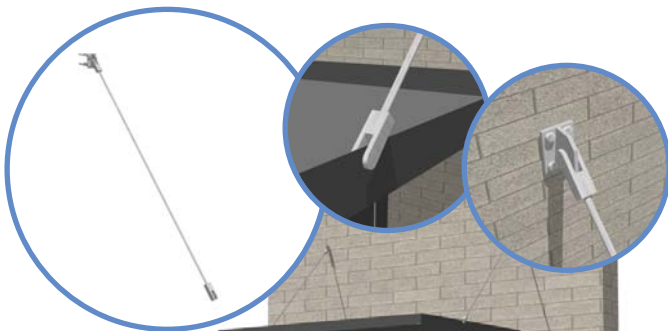

Integrated **Drainage Holes** along the front edge allow rainwater to drain away from the canopy surface.

Precision-folded Aluminium Sheet creates clean, sharp edges and a seamless, modern appearance.

Support Details

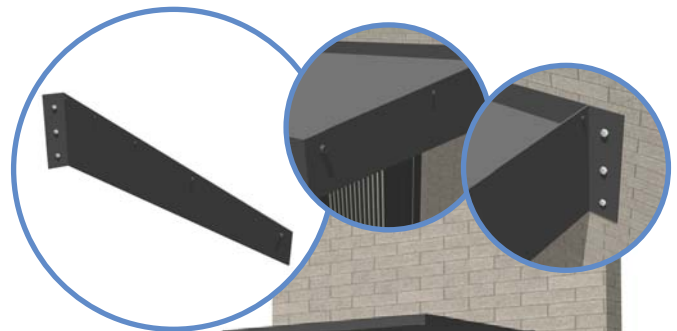

Stainless Steel Rod Support

Hanger Rod
316L Stainless Steel

Supported by stainless steel tension rods, this option offers a clean and lightweight appearance. Ideal for projects requiring a sleek, modern look.

Wall Bracket Support

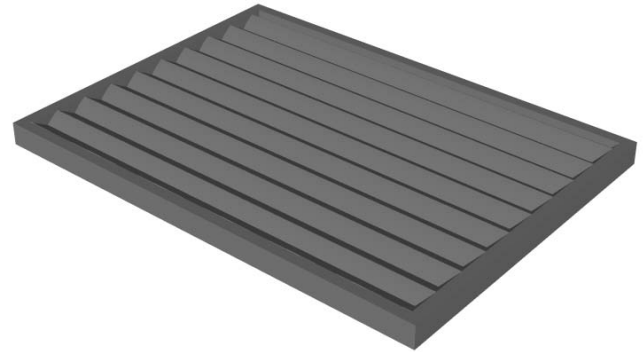

Wall Bracket
5005 / 5052 Alloy Sheet

Wall-mounted brackets provide a strong and practical support solution. Suitable for projects where a bold architectural look is preferred.

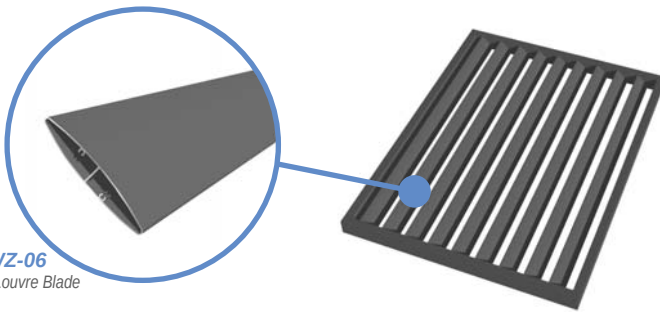

Louvre Blade Entrance Canopy

Manufactured from aluminium **Louvre Blades** set within a mitred frame, providing ventilation and reducing direct sunlight at entrances.

The blades are secured to aluminium flat bars at both ends, creating a complete assembly with concealed frame connections and no visible rods.

Key Features

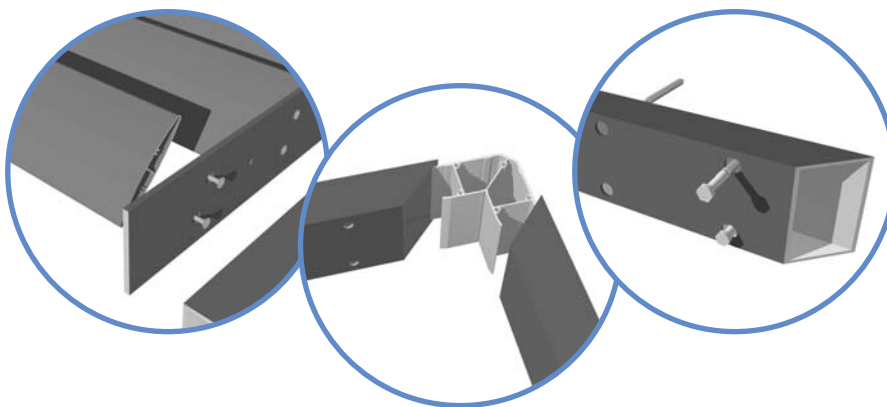

GM-NEWZ-06
120x20mm Louvre Blade

Made from 120 × 20mm **Louvre Blades**
Set at a 45° angle with 118.5mm centre-to-centre spacing.

The angled blades provide ventilation while reducing direct sunlight, with a clean, streamlined appearance without visible support rods.

Support Details

Each Louvre Blade is secured to perforated 90 × 6mm Aluminium Flat Bars at both ends, forming a complete blade assembly.

The frame sections are joined at 45° mitred corners using internal corner stakes for a clean, seamless finish.

The assembled frame is fixed to the wall surface using suitable coach screws or bolts. The pre-assembled Louvre Blades and Flat Bars are then screwed to the frame to complete the installation.
